SQL | Redux | React | Next.js | JavaScript | TypeScript | SCSS | Material UI | HTML | CSS | C# | Node.js | MongoDB | Git | Source & Version Control | UX/UI | Drizzle | Entity Framework | Postgres | AWS Services | Relational Databases

Career Experience

MadeLabs | Remote Software Engineer

2022– Present

Contribute to both front-end and back-end development tasks. Assist fellow team members and foster positive work relations via teaching. Provide valuable feedback to improve visual performance of the application by coordinating with designers. Collaborate with the Project Manager to develop informative financial reports within the application to ensure presentation of valuable information to users.

- Independently executed a comprehensive integration of Stripe as the payment processor for subscription services, achieving seamless functionality.
- Implemented performance enhancements and major infrastructure changes to streamline development processes.
- Revamped a rich text editor using Draft.js, while ensuring long-term maintainability.
- Demonstrated exceptional productivity by resolving 60% of all assigned tickets throughout the year.
- Proposed enhancements in design and adopted best design principles in line with company's branding guidelines.

United Water Restoration Group | Ormond Beach, FL Technical Project Manager

2022

Managed and administered all aspects of front-end and back-end development infrastructure. Spearheaded multiple projects' development from conception to completion. Developed product goals and requirements in close collaboration with management and other associates. Maintained project timeframes, budget estimates, and status reports. Established and executed training processes for all technical personnel.

- Improved performance and incorporated new features by modifying design parameters.
- Created two full-stack applications from concept to production individually.
- Enabled implementation of new and optimized company processes.

United Water Restoration Group | Ormond Beach, FL Full-Stack Developer

2021 – 2022

Reviewed code, debugged errors, and troubleshoot issues. Developed and designed front-end web architecture while ensuring application responsiveness. Engaged with graphic designers on web design features. Created and administered functional databases and applications. Met and exceeded technical and consumer needs.

- Devised and implemented project plans and multiple utility applications in line with business needs.
- Oversaw project development milestones from initial steps through final delivery.

Licenses & Certifications

Certified JavaScript Developer – W3Schools' JavaScript exams – 2022
Certificate of Completion – Boise Code Works | Boise, ID – 2020

- Developed multiple full-stack applications and used Scrum/Sprint planning to effectively collaborate in a team.
